***Drawings***

The drawings were received on 9/8/06. These drawings are approved.

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 8-11 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed to a judicial exception (an abstract idea); as such, pursuant to the Interim Guidelines on Patent Eligible Subject Matter (MPEP 2106)), the claims must have either physical transformation and/or a useful, concrete and tangible result. The claims fail to include transformation from one physical state to another. Although, the claims appear useful and concrete, there does not appear to be a tangible result claimed. Merely calculating  $\beta$ , refractive index, and or  $\Delta n$  would not appear to be sufficient to constitute a tangible result, since the outcome of the calculating  $\beta$ , refractive index, and or  $\Delta n$  step has not been used in a disclosed practical application nor made available in such a manner that its usefulness in a disclosed practical application can be realized. As such, the subject matter of the claims is not patent eligible.

***Reasons for Allowance***

Claims 12-15 allowed.

Claim 8-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 101, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

As to claims 8-15, the prior of record, taken alone or in combination, fails to disclose or render obvious a refractometer comprising a pair of fluid-containing chambers separated by a transparent window through which said light beam passes, said chambers each forming a cavity which contains at least two plane, non parallel surfaces, said chambers contains fluids of refractive index  $n_1$  and  $n_2$  and are characterized in that said chambers comprise entrance and exit beam passing plane surfaces, at least one of which has no other internal beam passing surface parallel thereto, in combination with the rest of the limitations of claim the rest of the limitations of claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
